

KNIVES 1000V

EGA Master insulated tools comply with IEC 60900 international standard, each one of the pieces being tested at 10,000V (10 times the voltage we certify). They are also tested rigorously according to what the norms establishes: adherence test, impact test, flame propagation test and dielectric penetration test.

 **1.000V**
 IEC 60900

MAIN APPLICATION FIELDS

Electrical installation	High Voltage networks	Electric maintenance
Power Plants	Low Voltage networks	Fire-fighters
Electric Stations and substations	Telecommunications	Lighting installation and repair

CAUTION

- 1** Don't ever use tools under voltage if they present pores, fissures, encrusted elements or if the white insulation layer is visible.
- 2** **Insulating floors and safety shoes** are recommended to work under voltage.
- 3** **Avoid contact with water** while working under voltage.
- 4** **Do not ever touch directly any item that may be under voltage.** Use a voltage tester to check first.

KNIVES 1000V

EGAMaster 1000V Knives are designed for cutting and stripping wires with maximum safety in electrical work.

 **1.000V**
IEC 60900

1. The spine of the blade is coated with plastic in order to prevent short circuits.

2. Ergonomic 2-component isolated handle offers maximum grip and safety against possible contingencies.

3. Includes protective cap.

4. Anti-shock guards and ends.

5. Suitable for ambidextrous use.

6. Un-erasable laser marking.
