

SPRING CLAMP FITTING AND REMOVAL PLIER

Pliers for removing and installing self-locking elastic clamps, ranging from 18 to 54 mm in diameter, are specifically designed for the quick installation and removal of hose clamps or click-type clamps in hard-to-reach areas.

Easy to maneuver with one hand

1. The flexible cable allows easy access to tight spaces.

2. The tool's robust design and high cable strength allow for greater clamp opening forces.

3. With a ratchet locking system, allowing for easy and secure clamp removal or installation.

4. Non-slip handle for optimal grip.
